Agency Authorization & Security Acknowledgment

Agency approval for individually paid subscriptions

Legal agency name: _____
Agency mailing address: _____
Authorized signatory and title: _____
Security / enrollment contact email: _____
Authorized agency email domain(s), if applicable: _____
Effective date: _____

1. Agency authorization and no-cost scope

The undersigned authorized representative approves NarrateEMS use by the agency's verified, authorized workforce members for legitimate agency documentation, contingent upon an effective applicable BAA, agency ePCR permissions, security controls, and law. The agency is not purchasing subscriptions or assuming liability for individually paid subscription charges solely by signing this form. Users may separately pay NarrateEMS $29.99 per month subject to their own plan terms. The agency can withdraw organization-wide permission or particular user permissions at any time by sending authenticated notice to NarrateEMS.

2. Agency email verification; manual fallback

Agency may permit automatic membership verification only for the specific agency-controlled email domain(s) listed above, if it expressly authorizes that method. Domain ownership and control must be reasonably verified by NarrateEMS, and domain verification alone does not override the agency's duty to promptly remove access for former or otherwise unauthorized members. NarrateEMS may require manual verification if a user has no agency-issued email, uses a personal address, has ambiguous status, or if the agency has not enabled trusted-domain auto-enrollment. The agency will maintain an authorized contact to resolve such cases. The agency may disable domain-based verification by written notice; NarrateEMS will then use the approved manual workflow.

3. Agency and provider onboarding acknowledgments

The agency acknowledges the following operational responsibilities:

- A signed and effective BAA and agency authorization are necessary before real PHI is processed.
- Each user must have an individual NarrateEMS account; no shared passwords or credentials.
- Only individuals who may access relevant agency ePCR and patient information may use NarrateEMS.
- Providers must review, correct, and approve generated chart content before official ePCR submission.
- Agency controls its own devices, browsers, networks, ePCR credentials, and internal policies/training.
- Users must clear or refresh sessions as instructed, particularly on shared devices, to avoid exposing PHI.
- Agency promptly reports suspected unauthorized access, PHI exposure, credential compromise, and user separation/revocation to narrateems@gmail.com.
- Providers must use normal agency documentation procedures during outages or failures.
- Agency has been offered the Terms of Service, Privacy Policy, and Service Level Agreement.

4. Revocation, multiple agencies, and verification

Agency authorization is limited to this agency and does not authorize use at any other organization. A user employed by multiple agencies requires separate approval by each. Agency may revoke authorization by emailing the contact above from a previously verified agency contact or another authenticated channel. Following verification, NarrateEMS will disable affected agency-specific PHI access promptly. The agency will supply current contacts for urgent access revocations and assist in investigating any access dispute.

5. Relationship to external systems

This acknowledgment does not constitute authorization from Zoll or any other ePCR vendor, and does not waive agency contractual obligations, system permissions, cybersecurity procedures, or licensing restrictions. Both parties must independently confirm that proposed integration/use is permitted under applicable contracts and technical controls.

6. Acknowledgment and signatures

The signatory certifies authority to approve the agency's use of NarrateEMS, verify eligible workforce members, and enter this acknowledgment for the agency. This approval is subject to continued compliance with the effective agency BAA.
