# Service Level Agreement

Availability, support, maintenance, and incident communication

This SLA applies to active NarrateEMS subscriptions and is incorporated into the applicable Order Form and Terms of Service. NarrateEMS does not presently provide a contractual uptime guarantee unless expressly stated in a signed Order Form or amendment.

## 1. Availability and dependencies

NarrateEMS depends on third-party infrastructure including Microsoft Azure services, Groq where used, Supabase for account/authentication infrastructure, internet connectivity, and the customer's EMScharts/ePCR environment. Stripe supports billing but is not required for chart generation. NarrateEMS will use commercially reasonable efforts to keep the Service operational, but availability may be affected by systems outside NarrateEMS's control.

## 2. Planned maintenance

For planned maintenance expected to materially interrupt active use, NarrateEMS will use reasonable efforts to provide at least 48 hours advance notice to the customer point of contact. Where practical, disruptive maintenance will be scheduled during lower-use periods.

## 3. Incident communication

- For a confirmed unplanned outage or material degradation affecting documentation generation, NarrateEMS will use reasonable efforts to acknowledge the incident to affected customer contacts within two hours during monitored support periods.
- NarrateEMS will provide material updates as reasonably appropriate until resolution.
- For significant incidents, NarrateEMS may provide a short post-incident summary after resolution where useful and appropriate.

## 4. Support

Support email: narrateems@gmail.com. Support is generally monitored Monday–Friday, 9:00 a.m.–6:00 p.m. Eastern Time, excluding holidays, with best-effort attention to urgent issues outside those hours. Complete service outages are treated as priority issues; partial degradation is generally acknowledged within two business days; billing/account issues within three business days.

## 5. Remedies

NarrateEMS does not presently offer automatic service credits for downtime. Material prolonged service issues may be addressed case-by-case in writing.

## 6. Expected failure behavior

- Loss of connectivity or an unavailable upstream AI/speech provider may prevent or interrupt documentation generation.
- A failed NarrateEMS session does not replace the provider's responsibility to complete and verify the official ePCR using the agency's normal workflow.
- Customer EMScharts/ePCR outages, device failures, local connectivity problems, and customer misconfiguration are outside NarrateEMS's direct control.

## 7. Updates

NarrateEMS may update this SLA as the Service matures. Material changes will be communicated through reasonable means. A signed Order Form may provide customer-specific commitments that supersede this SLA for that customer.
